

# ROTOR/STATOR LAMINATION

## PUSH-PULL FEEDING SYSTEM

- High performance Torque-Servo Roll Feeders
- Materialwidth up to 240 mm
- High performance push-pull systems
- Precision up to +/- 0,02 mm
- Versatile and intuitive control
- Elaborate safety functions

## CUTTING SHEAR

- High speed electric cutting shear
- Up to 640 mm Material width
- Cutting force 70 kN
- Integrated in main control system

## ACCESSORIES

- Material Thickness Measuring
- Band cleaner
- Lubrication System (Spray or Rolls)

# ROTOR/STATOR LAMINATION

INDEXING/STACKING CONTROL

## POWERFUL CONTROL

- User-friendly interface on large monitor
- Intuitive, customizable industry-standard touch HMI
- Proven and versatile system

## EXTENSIVE BASIC FUNCTIONS

- Independent control of up to 12 motors possible
- Up to 108 auxiliary sliders/tool functions control
- Individually programmable swirl function
- Control of external components such as conveyor belts, shears, ejectors, etc.

## UPSCALING AND ADJUSTABLE SYSTEM

- Band thickness and stack height measurement including automated stack height correction
- Data management and backup of e.g. stack height, band thickness, etc.
- Tooling protection control
- Tool monitoring including slug control
- Press force monitoring (2 / 4 channels)
- Integration of customer-side components

## ROTATING SYSTEM

- Dynamic Servo Torque Motors (air or water cooled)
- Gearless transmission from the engine to the belt
- Use of existing servo motors with the controller
- Modular and adjustable motor holder

## ABOUT US

For 50 years we have developed and produced quality, high precision gripper and roll feeders.

Our focus is on high precision quality products at a fair price.

Thanks to our innovative technology and continual improvement, we have established ourselves as one of the European's leading suppliers of feeding technology for the stamping and metal industry.
